

GENERAL INFO

SPECIALTY CARTRIDGES

Ceramic Filter Cartridge

The Puretec CE941 is a silver-impregnated ceramic cartridge which is highly effective in removing sediment, bacteria, taste, odour, chlorine, heavy metals and cysts from drinking water.

This cartridge is capable of removing more than 99.99% of Cryptosporidium, E.coli, and Vibrio Cholerae in water. It is designed to be used in conjunction with a prefilter as it has a very fine micron rating.

Extended life is achieved with the cleanable ceramic surface that can be cleaned many times with a soft brush or scotchbrite. This cartridge will last up to 18 months.

Model	Description	Sizes (inches)	Flow (Lpm)	Micron Rating	Diameter
CE941	Silver impregnated	10"	3.3	.2	Standard

MATERIALS OF CONSTRUCTION

- Filter Media Ceramic casing, silver impregnated carbon
- End Caps Polypropylene
- Inner/Outer Wraps Polyolefin
- Gaskets Buna-N

FEATURES & BENEFITS

- The filtration efficiency is 0.9 micron absolute (Spectrum Labs).
- Removal of >99.9% of particles larger than 0.5 micron (Spectrum Labs).
- Removal of >99.7% of particles larger than 0.3 micron (Spectrum Labs).
- Removal of >98% of particles larger than 0.21 micron (Spectrum Labs).
- >99.99% removal of Cryptosporidium, E. coli, and Vibrio Cholerae
- Ceramic elements may be cleaned 100 or more times and will last up to 18 months.
- Silver-impregnated and will not permit bacteria growth.
